my books are about one thing and that is the mind 1 where did our mind come from in a natural point of facts 2 what did our mind do during its historical cultural existence for the past 100 000 years 3 who owns and who controls our mind we don t actually control our mind and makes free will an ambition and not a fact the centers of power control our mind for the last 5 000 years we have made simulations about believing in a god and call it religion we have made simulations about society in believing in governments laws and politician and call it statism 4 in my books i explore solutions to live as a free individual and that is only possible if we all live in a free world without the political financial and religious oppressors i call the centers of power how can this work out for me if i am in love with mental slavery how do i unslave am i a monkey with an ego or am i a cosmic archaic mind being involved in natural philosophy to answer questions on where i come from who i am where i am going and to stand up for it challenge authority lead me into prison for over 10 years how i became the enemy of the german state a danger to its citizens and to my five children will be covered in my two books people that are dangerous to the system are tending to be removed i look at the centers of power its origin and the way it divides the people in order to enslave them and it makes me think is it monkeys running society so how do we unite and make love win to change the system and push for peace we are now living in historical times and like it or not the choices that we will make over the next few years will have profound implications to the future of the entire human race corona plandemic whether or not to wear the mask whether or not to take the vaccine whether or not to get the health app whether or not to fill out the digital visitor card whether or not to take the digital money chip in any case the attempt by the centers of power to reset global society leads eventually to a global awakening of the truth my journey is to go back to the foundations to get

things right to discover truth the cosmos has to be first debugged and to make a model of the cosmos typically large groups of intellect don't get it right because they are consensus orientated like in politics it is not truth orientated in the past we have only found this by the outsiders there we find intellectual progress the other reason why it is so hard to find objective truth is that our brain is operating just like a computer on bio chemical algorithms by electricity and hormones running the hardware to simulate software when we experience pleasure or pain when we see hear smell the outside world it is always an interpretation a simulation but never the actual objective truth or the reality of the outside world the cosmos can be computed by us in a simulation matrix and so can our society be computed but so far no human has understood the underlying structures of that matrix a society like ours to discuss truth can be a very dangerous place if you question authority i found it hard to fit in the academic system as a scientific philosopher so i started the path of knowledge without the academic prison and in order to finance this i started my own companies in the usa germany and the netherlands where i eventually ended up in a german prison that happened primarily because i used psychedelic magic mushrooms to detach me from the general agendas of a slave in society i present the theory that we are not living in a mechanical cosmos and a material world but a computational cosmos a simulation made by our mind just as it makes a dream work or a believer of a god that lives in the clouds called heaven we are a dream state in the body of a monkey becoming awake that we are neither monkey nor a sentient being to wake up from those dream simulations is probably the hardest accomplishment and usually happens late in our life i doubt that reading a book following a guru god or scientist will help in this endeavor in my case the search for objective truth reality and the knowledge of relevant information in combination with the magic mushrooms did the switch of perspective probably also a bit of luck called non linear dynamics and chaos what i really was surprised by from the awakening aspect was altruistic unconditional love this concept is not naturally accepted by our ego self driven software however it turns out that this energy is a force that can only be activated once we achieve a free will of thought that is what makes some of us unlike any other living organism on

this planet to forgive your enemy to love your enemy are concepts of meme that contradict the animal mind of most humans well once we understand that we are like a computer thinking with bio chemical algorithms it is not a surprise that we start life with an unfree will of thought a simulation of the brain looking for food sex and all the other things that feed our ego self telling us how great and wonderful we our simulation of the me actually is i have never experienced that a person is really evil or that he and she wants something evil what people do can be horrible and the mess they make can have an incredibly destructive potential but if you look closely at what s going on it may not stop but if you condemn it it will stop even less when one works through it accepts it perceives it then a light of love shines out there are no bad and evil people at all there are only people who are on the way whom one must invite and pick up evolution on how cosmic space time creates meme and life how it drives to ever more complexity we might call consciousness evolution from a living organism called ape with a brain that does interpretation simulations of colors and sounds from the outside world communication between us but unlike any other brain on this planet it can simulate also altruistic love mathematics arts morals and ethics evolution from a hunter gatherer tribe to a complex modern civilization still being an animal with universal power ambitions of the ego self to understand consciousness and enlightenment and our part we take in the cosmic archaic mind we call nature using computer science artificial intelligence agi to understand how our consciousness works in living organisms and especially in the human brain to perceive the simulations that make up our worlds we make up in politics religion and business the internet becomes mightier than the sword of the oppressors now we have access to meme to information directly without the editing or censoring of an official cultural gate keeper what it does to freedom and change during 2020 is the main topic of the book to predict what 2030 will look like when governments start a direct war against their citizens the deep state within governments as the global center of power and their agenda of a great reset the rise of slavery capitalism and democracy central banks imf and world create fiat money out of thin air and therefore have control over third world countries with their imposed conditions of these loans representative

democracy is a plutocracy of the very few ruling over their sovereign citizens we need a direct democracy right now outline cases where the media propaganda has served political agendas like false flag attacks on libya iran syria iraq 9 11 and corona who runs global politics and societies since the 18th century the wall street financed wars rockefeller rhodes co financed adolf hitler to prevent a united europe with russia we have a 147 corporations that control the economy and the media but do we have another power center cult the new world order great reset is coming and we can be sure that the global elite will be successful in that the most powerful spell on humanity is electoral democracy the answer to that problem is not a new political party but rather local community building spread true information on the internet and the resistance

darwin and theories of aesthetics and cultural history is a significant contribution to the fields of theory darwin studies and cultural history this collection of eight essays is the first volume to address from the point of view of art and literary historians darwin s intersections with aesthetic theories and cultural histories from the eighteenth century to the present day among the philosophers of art influenced by darwinian evolution and considered in this collection are alois riegls ruskin and aby warburg this stimulating collection ranges in content from essays on the influence of eighteenth century aesthetic theory on darwin and nineteenth century debates circulating around beauty to the study of evolutionary models in contemporary art
